

# ACCELERATING DISCRETE MANUFACTURING WITH DIGITAL INTELLIGENCE

MV2 is a Manufacturing Execution System designed to improve performance on the shop floor. With real-time production visibility, MV2 helps manufacturers increase efficiency, improve execution, and deliver on time.

These mission-critical tools become essential to daily operations, supporting consistent production success.

## Powerful Modules. Connected Operations.

### PRODUCTION MODULE

Ensures timely job execution, reduces errors, enhances visibility, and broadcasts supervisor decisions across all workstations.

### INVENTORY MODULE

Streamlines material cost management, updates production orders, track materials, and enables inventory analysis through a single interface.

### QUALITY MODULE

Seamlessly integrates production and quality, offering flexible control plans, testing, and non-conformance management, enhancing visibility and swiftly addressing quality issues.

### KANBAN MODULE

Enhances manual Kanbans with advanced tools, updating boards, triggering alerts, and syncing with ERP systems for efficient inventory management.

### ATTENDANCE MODULE

Replaces manual systems, consolidates attendance and production data, and eliminates the need for merging disparate data sources.

## THE SHOP FLOOR COMMAND CENTER

An MES that delivers real-time visibility, actionable data, and the speed to make better decisions to be proactive not reactive.

REAL-TIME VISIBILITY

FASTER DECISIONS

OPERATIONAL EFFICIENCY
